

1. Write a value returning function that receives three integers and returns the largest of the three.
2. Write a value returning function that receives a character and returns true if the character is a vowel and false otherwise.
For this example, vowels include the characters 'a', 'e', 'i', 'o', and 'u'.
3. Create a calculator that takes a number, a basic math operator (+, -, *, /, ^), and a second number all from user input, and have it print the result of the mathematical operation. The mathematical operations should be wrapped inside of functions.
4. Write a function which calculates the power (e.g. 23)
5. Write a function to Print the following output
1
12
123
1234
12345
